

MISSION

To provide a range of outdoor learning experiences to children with special educational needs and disabilities.

VISION

Every child with special educational needs and disabilities has the chance to enjoy the outdoors, and to learn in outdoor environments.

VALUES

We Are Fun

We provide a fun and adventurous atmosphere, where children can learn through play and explore their environment. We let each child pursue their interests and discover new experiences.

We Are Adaptive

Each child's individual needs are at the heart of what we do. Each child is listened to, and their own wants and needs are addressed. We change and adapt activities to suit all the children we work with.

We Are Collaborative

Children and adults work together to create fantastic memories and learning experiences. We encourage teamwork between children and allow them to work together with or without adult support, developing crucial communication and social skills. We aim to work with other community and public sector organisations.

We Are Supportive

We provide a nurturing and caring atmosphere in which children can be themselves, have fun, and gain independence. We give parents, guardians, and carers valuable respite time while their children are in a safe and welcoming environment.
